

Engagement & Management Period

Engagement Period

Early Adopter:

July 2024 – July 2025

Token Pre-Sale:

July 2024 – December 2024

Token Sale:

January 2025 (Start)

the process of integrating the tokenization process with the commodity exchange trading system to bridge the financing process and physical gold pawning by Customers of Commodity Exchange (CCE) members.

Management Period :

January 2025 (Start)

1st ROH Distribution:

August 2025

MBXAU token built into METALBANK X bridging platform becomes your life time earnings engine, directly discretion on your hand.

METALBANK X bridging platform is fully integrated with the national and global commodity exchanges also the clearing house institutions to support lending liquidity for the commodity exchange investors.

Integrating Ecosystem

Protect Your Future Wealth

Lifetime GoldDrops

Generating Lifetime Returns for Token Holders

1. Interest from Gold Pawning

When individuals (CCE) pawn their gold, they agree to pay interest on the value of the gold they pledged. This interest is collected as a revenue in the form of the liquidity that provided from the gold backed by tokenization.

2. Interest from Gold Financing

Offer gold financing services where MBXAU token provide a cash liquidity to borrowers in commodity exchange and get a revenues in form of interest payments. Borrowers could be individuals, small businesses, or institutions requiring short-term liquidity to buy physical gold in commodity exchange. The interest rates can be determined based on market conditions and risk assessment of borrowers.

3. Lifetime Token Holder Returns (ROH)

Distribute the interest and fees as the MBXAU holders a lifetime earnings collected from the pawning and financing services proportionally among the token holders. This can be done through a smart contract that automatically calculates and distributes the lifetime Return on Holder (ROH).

4. Token Pawning Services

Allow token holders to pawn their MBXAU tokens in Metalbank platform and exchange for fiat currency or stablecoins. The pawned tokens serve as collateral, and borrowers pay interest to retrieve their tokens. In case of default, the pawned tokens can be liquidated to cover the outstanding loan amount. Also be able to collateralize their MBXAU tokens to borrow stablecoins, participate in yield farming, or engage in liquidity provision on decentralized exchanges (DEXs).

5. Transaction Fees & Spread

Charge transaction fees and market making spread for facilitating gold financing and pawning transactions on the Metalbank platform. These fees contribute to the revenue stream and can be distributed among token holders as dividends or used to buy back tokens from the market, thereby increasing their value.

6. Partnerships and Integration

Forge partnerships with the financial institutions, pawnshops, tokens generated a returns from physical gold transactions and gold refineries to expand the reach of the platform, increasing the token holder returns and attract more holders. Integration with existing financial infrastructure and payment systems can streamline operations and improve accessibility.

7. Staking and Yield Farming

Implement a staking mechanism where token holders can lock their tokens for a certain period. The locked tokens can be used as collateral to generate yield through lending or other DeFi protocols. The generated yield can then be distributed to the Stakers as returns.

8. Buy-Back and Burn

Allocate a portion of the profits generated from the gold-backed assets to buy back and burn a certain amount of tokens periodically. This reduces the token supply, potentially increasing the value of remaining tokens.

9. Token Buybacks with Gold Sales:

Use the proceeds from selling the physical gold (when necessary) to buy back and burn tokens, thereby reducing the supply and potentially increasing token value.

10. Risk Management

Implement robust risk management protocols to mitigate counterparty risk, market volatility, and fraudulent activities. Conduct thorough due diligence on borrowers and establish collateralization ratios to safeguard the interests of token holders.

11. Token Holder Annual Return Policy

Extends its functionality beyond tokenization to provide a suite of physical gold financing & pawning services. The platform integrates with existing DeFi protocols to ensure a seamless and secure experience for users seeking financial opportunities. Annual Return Performance Target for Token Holders: 12% or more per annum

Token Utility & Benefits

MBXAU tokens offer a myriad of utility and benefits within the physical gold ecosystem. Holders of MBXAU tokens gain access to provide a liquidity through peer-to-peer lending, decentralized financing services, enabling them to meet their short-term capital needs, seize investment opportunities and borrowing protocols, leveraging the gold-backed assets without the need for traditional financial intermediaries.

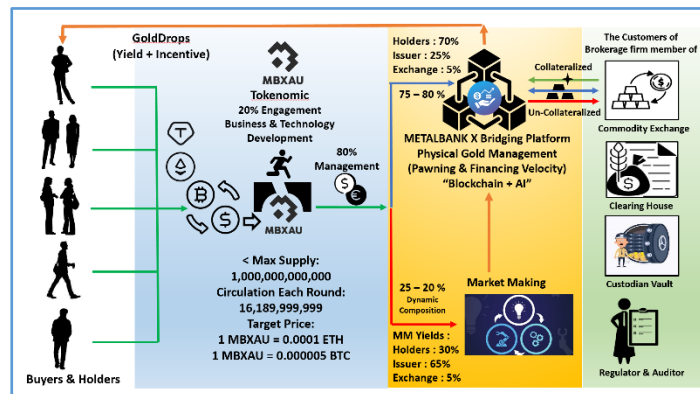

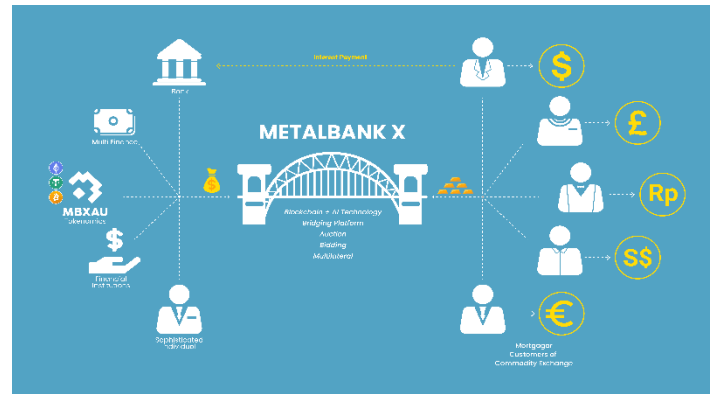

Additionally, MBXAU tokens facilitate seamless cross-border transactions, enabling users to transact value globally with minimal friction and cost directly inside the global physical gold market.

MBXAU tokens serve as a stable and secure store of value, hedging against inflation and economic uncertainty in the digital age.

MBXAU tokens can be traded on supported exchanges, providing users with liquidity and flexibility in managing their digitally gold holdings.

Holders of MBXAU tokens may benefit from transaction fees, staking rewards and other incentives built into the METALBANK X bridging platform.

Technology Solutions for Your Earnings

Token Code: Metalbank X (MBXAU)

Token Issuer: Metalbank Global Monetary

Total Supply: < Max. 1,000,000,000,000

No. of Tokens Issued: 16,189,999,999 (each round)

Blockchain Platform: Ethereum - ERC20

Initial Offering Price: 1 MBXAU = 0,0003 USDT, 1 MBXAU = 0.0000001 ETH

Exchange Platform: CeFi & DeFi Exchanges

Bridging Platform: Blockchain + AI technology

Minimal Transaction: 1,000 tokens

Burn Event: Timeline based on Market Capitalization

Commodity Exchange Partners:

Jakarta Futures Exchange (JFX)
Kinesis Exchange
Allocated Bullion Exchange

Clearing House & Depository Partners:

Kliring Berjangka Indonesia (KBI)
Pos Indonesia
Kinesis Monetary Indonesia
MetalPay Global Network
